Driver Sets New World Figures for 10 Miles-Pat McDonald Beaten

cover the final two miles in a little over one minute.

By the time De Palma had completed his task Resta had eventually succeeded in getting his engine to whir properly. The pair went off together in another ten-mile exhibition to furnish additional thrills for the onlookers. De Palma employed his clever jockeying methods, passing Resta and then falling back, until the final lap.

Resta rather surprised his Italian rival by putting up a real battle throughout the final two miles. De Palma maintained the lend, going away to a ten-yard margin on the backstretch, but the fight was not over. Resta forced his car to greater speed coming down toward the grandstand, but De Palma was the victor by a car's length.

but De Palma was the victor by a car's length.

The track and field events were so numerous that the spectators' heads were kept bobbing back and forth to follow the proceedings. Most amusing of the contests were the shoe race and the Roman charlot race. Street Cleaning Department wagons were the "chariots." The "drivers" were unable to hold their seats on the speedy "charicts" and went spinning along the ground before the race was finished.

In the shoe race, the competitors found the task of finding their shoes most difficult. They would pick up a shoe and not finding it their own would hurl it far up the track.

Interest in Motorcycles

While the crowd was greatly interested in the foot races, they showed more concern in the ability of the men to speed around the track on motorcycles. While no spills or accidents happened in these races, the men raced along so close together that falls were imminent. In the ten-mile motorcycle frace William Culbertson, of Motor Corps Squad 2, getting away with the

Interest in Motorcycles

While the crowd was greatly interested in the foot races, they showed more concern in the ability of the men to speed around the track on motorcycles. While no spills or accidents happened in these races, the men raced along so close together that falls were imminent. In the ten-mile motorcycle for race William Cubertson, of Motor Corps Squad 2, getting away with the limit handicap of fifty seconds, gradually left his rivals in the ruck, to win easily by fifty yards.

Pat McDonald, Egon Erickson and Matt J. McGrath, athletic stars of the department, found the handicaps allotted by the officials to their opponents too much to overcome. McDonald made an unsually good throw of 54 feet 9½ inches in the thirty-five poung weight event, but he found this effort only netted second place. The vistors fell to Harry Corpell of Traffic

lotted by the officials to their opponents too much to overcome. McDonald made an unsually good throw of 54 feet 9½ inches in the thirty-five-poung weight event, but he found this effort only netted second place. The victory fell to Harry Correll, of Traffic E, who, with a handicap of twelve feet, totalled 55 feet 5 inches.

McGrath also contested in this

How They Won

By A. C. Cavagnaro

Ralph De Palma, that daring demon of the auto racing world, gave a crowd estimated at 100,000 an idea of the capability of his motor when he created a new world record for ten miles in the first day of the field games of the New York Police Department, held at the Sheepshead Bay racetrack yesterday.

The Italian "flew" around the course at an estimated speed of 117 miles an hour, and was clocked in 5 minutes 78-5 seconds. This smashed his own record of 5 minutes 172-5 seconds, which was set recently.

It was planned to have Dario Resta compete against De Palma in the tussel to beat Father Time, but Resta's car balked on the first lap, preliminary to the flying start. Resta tinkered with his engine for some minutes and failing to diagnose the trouble was left behind by De Palma, who went out alone.

Speed Thrills Crowd

Passing the grandstand on a flying start, De Palma en were cord for him was predicted. De Palma kept up his consistent pace for four laps, when, on the final circuit, he applied more "juice" and the light yellow care leaped forward at greater speed, to cover the final two miles in a little over one minute.

By the time De Palma had completed his task Resta had eventually succeeded in getting his engine to whir properly. The pair went off together in another ten-mile exhibition to furnish additional thrills for the onlookers. De Palma employed kis clear.
